

Do you want to be part of RENIC?

What are our first initiatives?

- The characterization of cybersecurity research and innovation in Spain through the Catalog and knowledge map of R&D+i in cybersecurity

<https://www.renic.es/en/research-map-cybersecurity>

- Be an active member as well as Board of Directors member of the first European public-private partnership in cybersecurity

1 Visit our website: www.renic.es

2 Submit your application and justify the fit of your research team on the Network

3 Demonstrate and accredits research excellence in cybersecurity

Who are our members?

www.renic.es

contacto@renic.es

What are our goals?

- Improve the **positioning** of Spanish cybersecurity research and innovation
- **Cooperate and collaborate with other** national and international research networks
- Fostering **research excellence** in cybersecurity
- Contribute to the **creation** of innovative cybersecurity solutions
- Representation of the Spanish cybersecurity ecosystem
- **Identify, attract and retain** research talent in cybersecurity at the national level

About us?

We are the **Spanish Network of Excellence on Cybersecurity Research (RENIC)**, an **open sectoral association based on membership** that encompasses agents of the cybersecurity research ecosystem in Spain, mainly:

- Technological Centers
- Universities
- Research Centers

Membership is subject to the **accreditation of cybersecurity research excellence** by an external commission

What advantages can we offer you?

- Create specialization **nodes** in cybersecurity research topics.
- Incubate ideas and programs of **identification and resolution of challenges** in cybersecurity
- **Capture and Exchange research talent** within the cybersecurity sector
- Strengthen **collaboration with industry** for technology and knowledge transference
- Favor the establishment of **synergies and collaborations** among Network members.
